

# Together for Health at Myers-Wilkins

...is an innovative approach to improving the health and well-being of the students, parents and community members of Duluth's Hillside neighborhood. The Project builds on the strengths and diversity of the Myers-Wilkins School

Community, the Hillside neighborhood, health care and mental health providers, public health, and local community agencies. Access to a coordinated delivery of social, health economic and educational services have made the following impacts over the time period August 2015 through September 2017.
